

FULL Steam **AHEAD** *Building a Better Main Street*

CONSTRUCTION UPDATE

May 11, 2026

Moorefield Excavating has established traffic control between York Street and Toronto Street as work continues along Main Street East.

The eastbound lane asphalt has been pulverized, and sidewalk, curb, and boulevard removals have been completed on the south side of the street.

The storm crossing in front of Edge Automotive has now been completed.

This week, crews will continue installation of the storm sewer on the north side of Main Street from the storm crossing east toward Toronto Street.

We appreciate everyone's continued patience and support as construction progresses.
