Building a Better Main Street

CONSTRUCTION UPDATE

July 9, 2026

Residents and visitors will start to notice some exciting changes along Main Street as construction continues to move forward.

Earlier this week, crews completed the placement of new concrete curbs at the Toronto Street roundabout, helping define the shape of the new intersection and giving the community a first look at how the completed roundabout will take shape.

In addition, installation of the new sidewalks is now underway, bringing visible improvements that will enhance accessibility and pedestrian connectivity throughout the area.

Construction has also officially begun at the Minto Road roundabout, with crews starting roadway and underground infrastructure work in the area. This marks another major milestone as work continues to progress along Main Street.
